

TouringMag Checklist

- ☐ 1. Pressure gauge
- ☐ 2. Tire tread depth gauge
- ☐ 3. Portable air compressor
- ☐ 4. Patch kit
- ☐ 5. Check tire pressure using a pressure gauge before every ride.
- ☐ 6. Ensure tread depth is above legal minimums using a tread depth gauge.
- ☐ 7. Inspect tires for cuts, punctures, or embedded debris, and remove any foreign objects.
- ☐ 8. Use a portable air compressor to adjust tire pressure to recommended levels if necessary.
- ☐ 9. If a tire is punctured, temporarily fix it using a patch kit and plan for a proper repair at the earliest opportunity.
- ☐ 10. Check tire pressures when they are cold for accurate readings.
- ☐ 11. Regularly rotate tires if specified by the manufacturer to even out wear.
