

# TouringMag Checklist

- ☐ 1. Tire pressure gauge
- ☐ 2. Basic tool kit (wrenches, screwdrivers)
- ☐ 3. Chain lubricant
- ☐ 4. Clean cloths
- ☐ 5. Engine oil
- ☐ 6. Check and adjust the tire pressure with the tire pressure gauge for optimal performance and safety.
- ☐ 7. Inspect the chain for signs of wear and apply chain lubricant to keep it functioning smoothly.
- ☐ 8. Use a basic tool kit to check and tighten any loose bolts or screws on the bike.
- ☐ 9. Clean the motorcycle surfaces with clean cloths to remove dirt and debris, preventing corrosion.
- ☐ 10. Regularly check the engine oil level and add more if necessary to ensure the engine is well-lubricated.
- ☐ 11. Carry a portable air compressor for quick tire adjustments on the road.
- ☐ 12. Regularly clean and check your air filters to maintain engine efficiency.
